**Re: Inverness Drainage Improvements**

Dear Home Owner/Occupant:

The City of West Kelowna is contacting you to provide advance notice of stormwater upgrades coming to your neighbourhood.

Beginning the week of **July 4, 2023**, crews will install a new culvert off Inverness Road within the Webber Road Elementary School property to improve stormwater drainage and mitigate flood risks. The entire project is scheduled to be complete by August 31. For the safety of the public and crews working on site, a portion of the soccer field will be closed to the public.

As part of the project, crews will complete the following work within the Webber Road Elementary School parking lot and soccer field:

- Excavating a large trench
- Installing 1500 mm corrugated steel pipe
- Hauling materials and equipment in and out of the site

**What to expect during construction**

Construction will occur weekdays from 7:00 a.m. to 5:30 p.m. with the possibility of some weekend work. Residents can expect construction-related noise, vibration and dust while the work is being performed. We anticipate construction to take approximately 8 weeks to complete. The construction schedule is subject to weather, contractor timelines and other factors.

Dump trucks will be required to haul materials in and out of the site during the project, however, there will be no traffic delays related to the construction of this project.

We appreciate your patience and understanding as we complete these necessary upgrades. If you have any questions regarding this project, please contact me directly.

Regards,

Brent Morrison
