Attention: Residents adjacent to the Rose Valley Water Treatment Plant Area

Re: Rose Valley Water Treatment Plant Project

The City of West Kelowna is pleased to inform you that limited site preparation activity is scheduled to begin in the coming weeks for the Rose Valley Water Treatment Plant site. This early activity includes site clearing. Construction staging and timing of the Rose Valley Water Treatment Plant is in development and details will follow once final design of the plant is completed.

This first preliminary phase of activity is to only clear the site that will help guide final design of the plant. Subsequently, the construction staging and schedule will be confirmed and we will inform stakeholders and the public about our next steps, including public information sessions to learn more about the project.

Until then, notification of this limited preparation activity is to ensure we keep you informed as we work toward finalizing design and construction for the project.

If you have any questions or comments, please feel free to contact me as our plans develop.

Yours truly,
